Netherlands-based BMB Electronics signs a distribution agreement to sell and support home automation products from HAI.

BMB ELECTRONICS BV

HAI makes a selection of award-winning automation offerings-- including home control systems, programmable communicating thermostats, smart light switchines, whole home audio systems, video surveillance equipment, access control systems, touchscreen interfaces and online automation control software.

One can integrate HAI products wtih those from the company's Connectivity Partners, such as Elan, URC, Xantech, AMX, Crestron, KNX, Nuvo and Philips Dynalite.

"HAI product solutions perfectly fit the BMB product portfolio. They add a unique additional value to the entire product range, and to controlling lights especially. Our customers can buy everything they need for a complete installation," BMB's Willem Bok says.
