Al-Futtaim rolls out its iHOME display for Gulf Region consumer electronics and intelligent home systems during this week's International CES Hometech exhibition.

Al-Futtaim's iHOME in Hall 2 will feature best-in-class products from Panasonic, Toshiba, Sanyo, Aftron and Control 4.

CES Hometech, organised by Messe Frankfurt, is being held in Dubai for the second year, but this is the first full year it is under the auspices of the CES of Las Vegas fame.

Al-Futtaim is now the first international affiliate in UAE of the Consumer Electronics Association (CEA) of America. CEA, a trade organization for 2200 companies in the consumer technology industry in USA, owns and runs CES Las Vegas.
