16. 12. 2015

Here is a good reason (if any was needed) to stay until the end of the 4 days of ISE 2016-- Dr. Michio Kaku, one of the world's leading scientific figures, gives the Friday Closing Keynote.

Dr. Kaku is an expert in unified field theory, and uses the latest scientific research to base predictions on the trends affecting business, commerce and finance. He holds the Henry Semat Chair in Theoretical Physics at the City University of New York, received his Ph.D. in physics from the University of California at Berkeley in 1972, and has been a professor at CUNY for almost 30 years.

He is the author of several best-sellers, including the Physics of the Future and the Physics of the Impossible. His latest book, The Future of the Mind, details neuroscience breakthroughs that are unravelling the mysteries of the human brain.

Dr. Kaku's keynote takes place at 9am, 30 minutes before the show opens on 12 February 2016.

Other events taking place around ISE include the Smart Building Conference on 8 February (with a full-day programme chaired by Channel Media Europe Editor in Chief Bob Snyder), followed by the ISE Opening Reception on the same day at 6pm. 11 February has the Sports Venue Integration Summit in the morning and the Capital Summit in the afternoon.

In show firsts ISE 2016 will have a Drone Arena and a Dolby Atmos Immersive Theatre, an Arcam, Dolby and Genetec collaboration.
