

CEDIA announces the 2018 finalists for the Home Technology Professional Awards competition, honouring the top projects completed by home technology professional members in the past year.

“Every year the technical judges are blown away by the project submissions, the quality of work, and the creative solutions and this year is no exception,” CEDIA says. “We look forward to celebrating the finalists and winners at the respective CEDIA Awards events coming up over the next several months.”

The EMEA and global winners awards ceremony takes place on 27 September 2018 at the CEDIA EMEA Awards event hosted at the British Museum, London.

CEDIA member companies with finalist projects include:
