

CEDIA Hosts KNX Basic Training Course

Written by Frederick Douglas
16. 04. 2019

Installers wanting to become a certified KNX partner get the chance to do exactly that with CEDIA, as the association announces the dates for the next CEDIA KNX Basic Training course.

The 5-day course looks into all aspects and principles of the KNX protocol, and also includes a one-day Residential Networking course. It covers several in-depth topics, providing essential information for aspiring KNX partners, and concludes with an examination to test the knowledge gained. If a candidate passes, they automatically qualify as KNX Partner.

The topics covered by the course include:

- KNX Project Design ETS Professional - Basic.
- KNX Project Design ETS Professional - Advanced (only for informative purposes).
- KNX Commissioning ETS.
- KNX Diagnostics & Troubleshooting ETS.
- KNX System arguments.
- KNX System overview.
- KNX TP Topology.
- KNX TP Telegram.
- KNX Bus devices.
- KNX TP Installation.
- KNX Powerline.
- KNX RF.

"The KNX Basic Training course is a great way to really understand the fundamentals of the KNX ecosystem," CEDIA says. "This course includes both theoretical and hands-on programming exercises to build the attendees' understanding and confidence with the KNX system configuration tool."

CEDIA Hosts KNX Basic Training Course
