CEDIA announces a European roadshow for The CEDIA Designer (TCD)-- one taking the software to three locations across Mediterranean Europe to show installers the capabilities of the tool in their own language.

"The CEDIA Designer is a fantastic tool for our members and the wider industry to improve the professionalism and quality of home cinema design, as well as saving them valuable time on projects," CEDIA EMEA says. "We're excited to give integrators further afield the opportunity to gain an overview of the software, the different packages available, and the CEDIA member benefits."

The events are free-to-attend, and open to anyone interested in using the tool or having their products included in the design database. For the unfamiliar, TCD is a global cloud-based software allowing installers to design dedicated cinema or media rooms. It produces a complete 30+ page cinema design proposal complete with audio and video calibration reports, aesthetic renders and 3D CAD drawings of the room.

Event locations comprise the TOCQ Hotel, Milan (30 September), Novotel Nice Arenas Aeroport, Nice (2 October) and Hotel Catalonia Plaza Mayor, Madrid (4 October). Each of the events follows the same schedule, and concludes with a networking drinks reception for all attendees.
