Invision UK obtains the distribution of rack, mounting and cooling products from UK-based manufacturer AV Racks.

av  racks

AV Racks products promise to meet and exceed customer expectations by meeting the specific requirements of AV equipment and installation. The company uses high gauge steel for shelving and frames to add strength to support the weight of AV components, while threaded profiles and shelves eliminate the need for cage nuts.

Further simplifying installation are cable management facilities.

The company also offers a range of accessories for a complete custom storage solution, as well as a selection of rack-cooling solutions through the Cool Racks range.
