Remote Technologies Inc (RTI) simplifies the integration of SnapAV surveillance video solutions within RTI control systems with 2-way drivers for SnapAV Warpath PTZ IP cameras, DVRs and NVRs.

The Wirepath PTZ camera driver provides direct pan, tilt and zoom control of up to 24 IP cameras via RTI wired or wireless UI, including the RTiPanel app, with live video viewing as easy as choosing a camera from a list and recalling up to 256 camera position presents.

It supports jpeg image capturing and allows users to view cameras directly ethernet-enabled RTI controllers. The interface also enables automation functionality, with trigger events such as turning on lights or sending an email based on motion sensing, input sensing and video loss notifications.

Meanwhile the Wirepat DVR/NVR driver provides RS-232 and IP control over the recording and playback functions of SnapAV surveillance video recordings.

Further functionality is available when a NVR is controlled via IP, pushing notifications from video recorders to RTI processors and allowing installers to program automatic events.

"By offering seamless integration of SnapAV's Wirepath cameras and recorders into an RTI control system, it's now easier than ever for installers to provide their customers with intuitive control over their security on the same interface they use to control every other aspect of their
