Panasonic announces an addition to the HomeHawk home monitoring solution line-- the HomeHawk FLOOR (KX-HNC850), a security camera hidden inside a fully functional floor lamp.

Available in black satin or gray fabric finishes, the FLOOR lamp features a minimalistic design blending with any existing décor. The simple structure of the lamp also eliminates the need for drilling, cutting or mounting on wall, since customers simply need to plug it any electrical outlet.

Inside the lamp is a camera with a 140-degree wide-angle lens complete with microphone and speaker allowing for two-way communications. It records video in 1080p, and starts pre-recording two seconds before motion is actually detected. Geofencing provides smart control with customisable activity zones, while the addition of 8 AAA batteries allows for backup power.

The compatible with both Amazon Alexa and Google Assistant, and connects via wifi using the HomeHawk companion app. It integrates with other HomeHawk products, such as the SHELF and Front Door Camera, and users can access and control all products through the aforementioned app.

The HomeHawk FLOOR is available now.
