

Crestron Adds Hartmann & Forbes Shades

Written by Marco Attard
17. 03. 2015

Crestron teams up with Hartmann & Forbes to offer Creston Shading Solutions in an exclusive selection of "lavish" hand-woven textiles designed for use with the company's roller shade systems.

The collection features 40 textures in 5 colour stories ranging from pure white to chocolate browns and grays. Each shade is hand-woven according to window dimensions on traditional wooden looms, in widths up to 180-inch.

Also available are handcrafted valences in matching or complementary textiles to hide shade motor components.
