American low-voltage wire and cable manufacturer ICE Cable Systems finds a first European distributor, trade-only AV solutions distributor Invision UK.

ICE offers a one-stop-shopping solution, selling high-quality cable, speciality cable and wire--including CAT, HDMI, loudspeaker, coax, interconnects, structured and automation cables.

Products from the company also have a number of custom features, including ascending/descending foot markers (printed at 60cm intervals), Direct Burial Rated 12, 14 and 16 gauge Reference Series speaker cables (for indoor/outdoor use), EZ Strip tissue for easier stripping, the iLabel common-sense cable identification and labelling system, RoHS compliant cables, and "Wet-Slick Jackets" for less friction, easier pulls and more flexibility.
