Lightware will bring its 25G Hybrid Signal Management to InfoComm MEA.

The 25G Hybrid Signal Management allows managing, switching and extending the highest bandwidth digital and analog video, audio, Ethernet and control of multilayer signals..

Alongside the 25G, Lightware will show the MODEX family, variable modular extenders supporting the AV and Broadcast industry's formats. MODEX (Modular Extender) includes a range of modular transmitters and receivers extending digital and analog video and audio, USB KVM, Ethernet and control signals over a single fiber or CAT5/6/7 cable.

Go The MODEX Family
