pakedge
device&software inc.

Pakedge Device & Software launches an own fibre optic cable brand for residential and commercial AV projects, one designed specifically to work with the company's routers, switches and GBICs.

The cables should optimise network performance by providing an improved AV experience for the end-user, with less electromagnetic interference, greater speed capabilities (up to 10Gbps), greater bandwidth, greater durability, less signal degradation, elimination of heat dissipation and less transmission power.

Pakedge-compatible fibre optic cables are available in 1, 2, 3, 4, 5, 10, 25, 50, 75, 100, 200, 300 and 400m lengths, as well as custom lengths.
