

Kordz announces it will showcase the PSR3 AOC HDMI cable at ISE 2017-- a lightweight and flexible HDMI cable designed for installations demanding long length and high bandwidth.

The cable delivers HDR, 3D, 4K UHD and high frame rate signals, with HDMI 2.0 certification from DPL Laboratories ensuring maximum bandwidth of 18Gbps. It features a 1kg grip to ensure cable installation is a one-time job. The internals are further reinforced with Kevlar to add further flexibility and pull strength, while the lack of need for additional power further simplifies installation.

The zinc-alloy anti-vibration connector shell is 18mm wide, and the cable is available in a lengths starting from 10 to 30m, with longer sizes to follow.
