Chief adds new back covers to their lineup of aesthetic accessories: the **Fusion Universal Back Covers** hide exposed mount, cabling and other hardware for a cleaner look-- without the expense (or lead time) of custom cover solutions.

“Our partners have been asking for a universal solution to cover the backs of displays that would provide a more cost effective and better looking alternative than custom solutions,” Tony Caruso, Product Manager notes. “We’re glad to be able to offer that option.”

“This sleek, aesthetically pleasing cover is perfect for hotels, restaurants, airports and other public commercial areas,” adds Caruso. “Plus, we designed it to work wherever Chief Fusion ceiling mounts, carts, stands and freestanding video wall mounts are used.”

The cover, **a diamond-knit weave fabric**, is washable, breathable and lightweight for easy install. The steel frame ends curve toward the display, minimizing any visible gap between the display and cover. All covers come with locking interfaces for safety and security.

The Fusion Universal Back Covers come **in five sizes** supporting single, dual or triple-display applications with coverage ranging from 36 – 48”, 74 – 98” and 118 -142” (91 – 122 mm, 188 – 249 mm and 300 – 361 mm) wide for easy specification.
