

D-Tools Integrates Savant in SaaS Tool

Written by Alice Marshall
08. 10. 2019

D-Tools and Savant announce a team up enabling direct access to the complete Savant product specifications and dealer-specific, real-time pricing within the D-Tools Cloud environment.

D-Tools Cloud is an easy-to-deploy web-based Software-as-a-Service (SaaS) application allowing installers to intelligently go through sales prospects, quotes, system design and procurement. The integration of the Savant product catalog and pricing allows installers to deliver quick and accurate quotes and baseline system designs in real-time.

In addition, D-Tools Cloud users can generate multimedia proposals and browser-based plan view and line connection drawings for an enhanced level of customer engagement. A fully integrated workflow streamlines the assembly of proposals, system designs and purchase orders, and the sales process is complete with real-time proposal generation, e-sign capabilities and mobile payment processing.

D-Tools Cloud is available now.
