Tripp Lite unveils its HDMI extender and extender/splitter series, dubbed B126.

The product line extends HDMI signals up to 200' over a single cat5 cable while still maintaining reliable sound and video.

Devices in the series include the B126-002 and B126-004 extender/splitters (split a single HDMI signal into 2 or 4 respectively, up to 3 units can also be daisy chained), the B126-1P0 passive extender remote and wallplate units (extend HDMI signal up to 100') and the B126-1A0 active extender remote and wallplate units (extend signal up to 200').

Also available is an Active Extender kit including a local unit to connect HDMI output directly to monitor, together with local and remote units.
