

A Flexson Wall Mount for Sonos Port

Written by Frederick Douglas
10. 03. 2020

Flexson announces the Wall Mount for Sonos Port. Precision engineered for neat and easy installation, the Flexson Wall Mount simply screws to the wall, with the Sonos Port slotting in seamlessly.

The mount frees up space by mounting the Port to the wall and holding it securely in place. Customers can pair the mount with a padlock (not provided), meaning the Sonos component is kept completely safe from unwanted removal. As such, it is perfect for public spaces such as music venues.

Construction is in high-grade steel. The mount is available in black, matching the Port itself.
