Sanus starts shipping the EcoSystem, a multi-volt power supply and AV rack accessory suite designed to create seamless interaction between racks and low-voltage devices.

The setup is fully customisable, with a MultiVolt power supply featuring switchable outlets, 5V USB ports and x12 outlets together with a thermostat kit. In addition the package includes a list of accessories:

- Front and rear light control switches
- Master power switch
- 12 outlets with both 12V and 5V options
- Three back side 5VDC USB charging ports
- Six back side 12VDC ports with always on, switched and triggered options
- Automatically activated, temperature-sensitive fans
- Front side task light port and rear side task/work light
- Cable management channel

Sanus also has more accessories available, including LED lighting, fans, temperature gauges and additional cables. For more details, visit the link below...
