

It's no secret that while the coronavirus pandemic knocks out some parts of our industry, it elevates others.

Logitech, as a leading maker of remote working cameras and accessories, is one of those winners. Scott Wharton, Logitech VP & General Manager of the Video Collaboration Group at Logitech, posted on LinkedIn, "LOGI had one of our best quarters in 15 years. I'm proud of our contributions to helping the world grapple and thrive with the current challenges. Oh yeah, and VC had one of our best quarters ever at +81% YoY" So let's take a look at Logitech's financial results for the first quarter of Fiscal Year 2021.

- Q1 sales were \$792 million, up 25%.
- Gross margin was 39.2%, higher than expected before the virus.
- Q1 operating profits grew 75% to \$117 million, compared to \$67 million in the same quarter a year ago.
- Cash flow from operations tripled and reached \$119 million, compared to \$37 million in the same period a year ago.
- EMEA sales grew 21% (the region has seen double-digit growth in five out of the last six quarters).
